

Presents: Caveman AI Glossary

A Friendly Beginner's Guide to AI, Explained Like You're a Caveman Discovering Fire

1. What Is AI? (Caveman Edition)

- Smart tool that learns patterns
- Not magic, not alive
- Good at language, predictions, and repetitive tasks
- Needs instructions and boundaries

2. Core AI Terms (Simple + Friendly)

Artificial Intelligence (AI)

Tools that learn patterns and make decisions.

Machine Learning (ML)

AI that learns from examples instead of step-by-step rules.

Neural Network

A digital "brain" made of tiny math units.

Large Language Model (LLM)

AI trained on huge amounts of text to understand and generate language.

Training Data

Examples the AI learns from.

Prompt

What you tell the AI to get the answer you want.

Token

Small pieces of text the AI reads and writes.

Context Window

How much the AI can “remember” at once.

Hallucination

When the AI confidently makes something up.

Fine-Tuning

Teaching AI new skills with extra examples.

Embeddings

Math fingerprints of text that help AI compare meaning.

Vector Database

Storage for embeddings.

Agent

AI that can take actions, not just answer questions.

API

A way for apps to talk to AI.

Model Parameters

The internal “knobs” that shape how AI behaves.

3. Everyday AI Terms (Non-Technical)

Chatbot

AI you talk to.

Automation

AI doing repetitive tasks for you.

Personalization

AI adjusting to your preferences.

Workflow

A series of steps AI follows.

Guardrails

Rules that keep AI safe and predictable.

Bias

Patterns in data that can lead to unfair results.

Model Update

When the AI gets smarter or more accurate.

4. Caveman-Friendly Examples

AI as Fire

Useful, powerful, needs control.

AI as Mammoth Tracker

Sees patterns, predicts outcomes.

AI as Storyteller

Remembers many tales, invents new ones, sometimes mixes them up.

5. Caveman AI Tips & Tricks (Bonus Section)

Give Clear Instructions

AI works best with specifics.

Provide Examples

Show patterns you want it to follow.

Break Big Tasks Into Steps

AI handles step-by-step better.

Ask for Explanations

You can request reasoning.

Use Magic Phrases

“Rewrite,” “Summarize,” “Explain like I’m 5.”

Double-Check Facts

AI can be confident but wrong.

Save Good Prompts

They become your toolkit.

Use AI for Drafts

You stay in control of final decisions.

6. Future-Proofing the Glossary

- Add new terms as AI evolves
- Link glossary entries to deeper articles
- Use as a reference across your universe
- Turn into a lead magnet later
- Timestamp updates for SEO freshness

7. PDF-Ready Structure

This outline is already structured for:

- Quick publishing
- Easy PDF export
- Branding insertion
- SEO indexing
- Lead magnet conversion later
